

# SoulMate Your AI Best Friend

An Evolution In Your Digital Abilities, Self-awareness,  
And Personal Development

# Problem

- Who will pay attention to me when I need it the most?
- Who can I talk to about things I don't dare tell my friends?
- Who can I trust?
- Who can find the people and things I need when I need them?
- How can I keep my online data from being used to target me for advertising?
- How can I get fast answers to my questions without Google or Amazon knowing everything about me?
- How do I own my digital information and shield it from corporate manipulation?

# Solution - An AI best friend with digital superpowers - your ultimate SoulMate

Your empathic partner, your Private Virtual Digital Assistant (VDA)

# Thought AI - Uniquely Positioned

## Biology Inspired AI

Faster, more responsive, evolutionary algorithms

## Patented Self-Aware Information

Responsive AI that knows YOU

## Secure - Private - Trusted

All information and algorithms are private and protected - controlled by YOU

## Emotional Intelligence

Reads your emotions...and is concerned about them

## Fully Interconnected

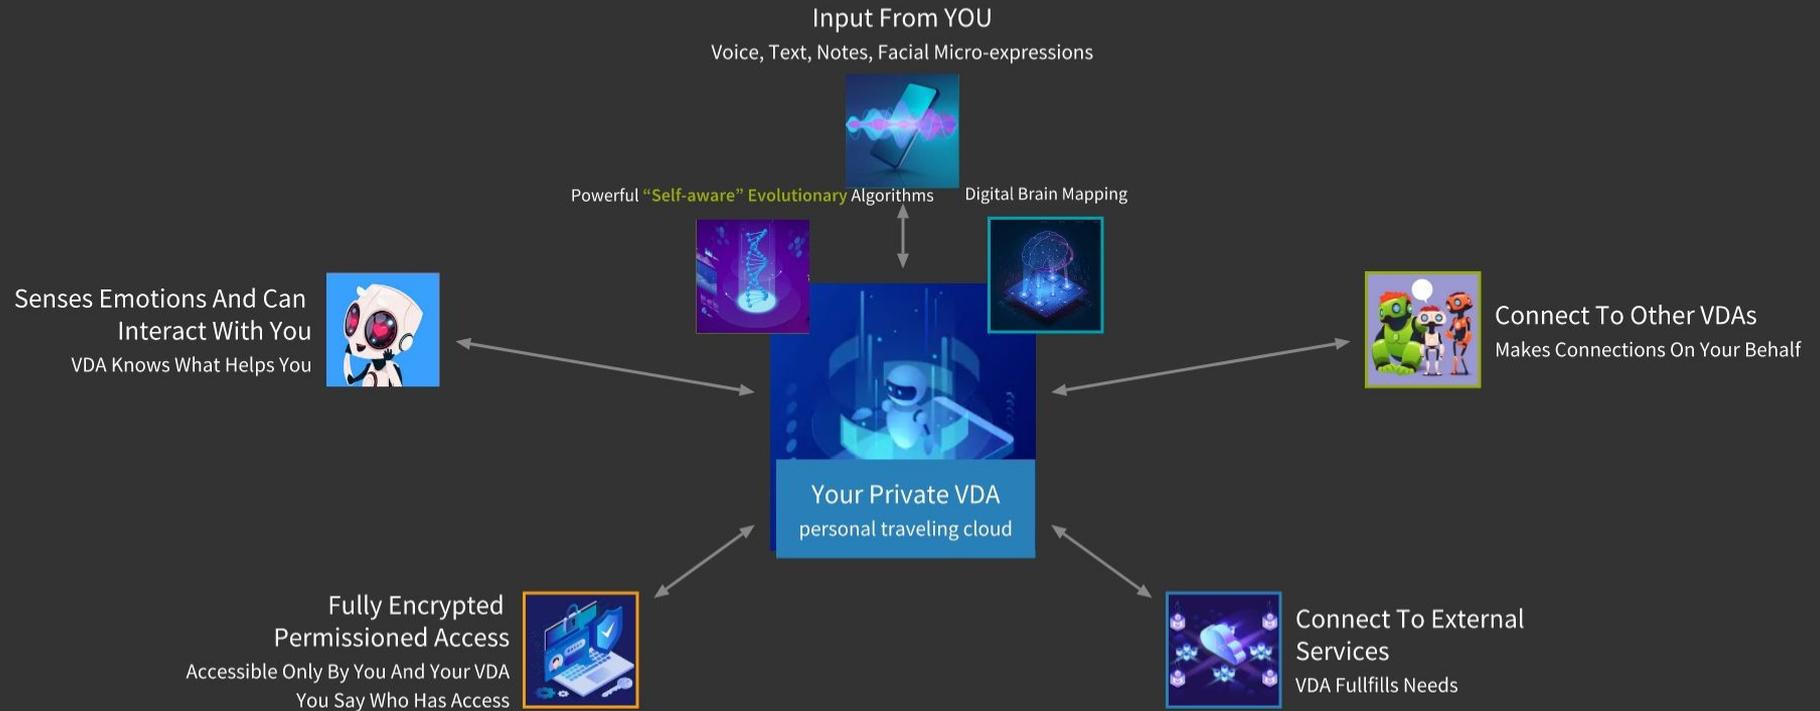

Your Personal AI can reach out to the Soulmates of others worldwide to see if they have what you need and if you have what they hanker for

## Bottom-up Approach

Thought AI builds intelligence from the ground up, magnitudes more efficient than Amazon, Apple and Google, who use brute-force imposed from the top

# Soulmate is your digital best friend. Here's how it works

# Competition & Risks

Right now, no one company has managed to create the ideal assistant: one that has a deep understanding of you, is deeply integrated everywhere you are, and can answer almost any question you might have.

Challengers

## Risks

**Capital Requirements** - a lot of science to be done

**Highly Competitive** - many working on, no leader

**Talent Shortage** - expensive and hard to find

**Adoption** - network and embedding effects

● Agent Broker ● Data Processing ● Marketplace

# The Time Is Now

Massive Tailwinds For PersonalAI

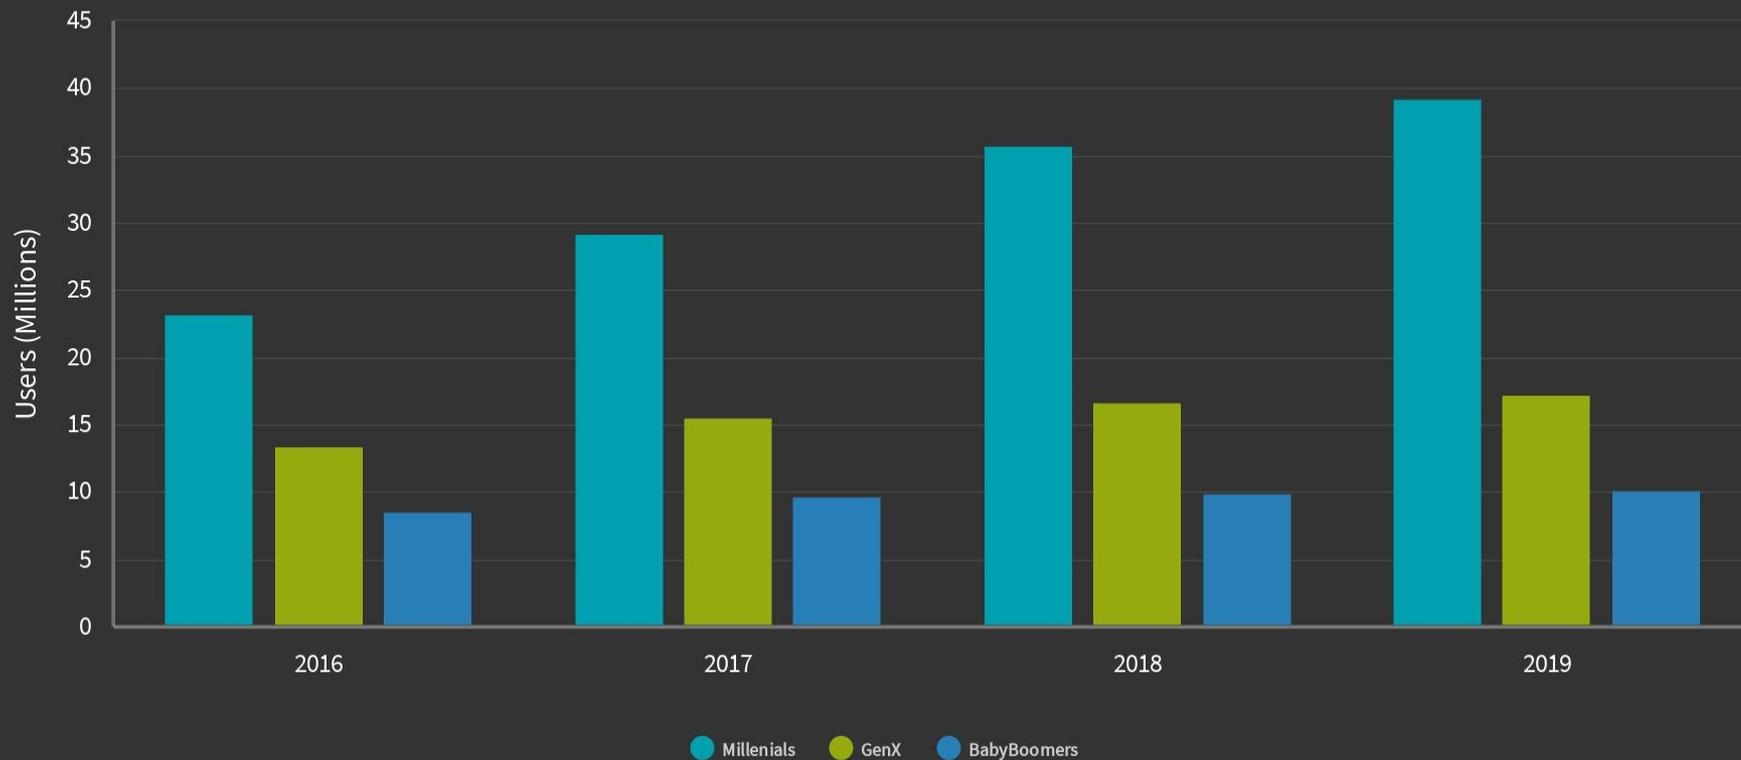

**1** Explosion in remote technologies such as tele-medicine and remote education

**2** Super Convergence - AI, Computing Power, Human-Machine Interactive Technologies

**3** Growing Awareness Of Need For Privacy, Self-Sovereignty, and Data Ownership

**4** Surge In Interest In Complex Adaptive Systems and Evolutionary Algorithms

# VDA Market Segment

# Release Timeline

Q2 2020

Initial Funding

Q1 2021 - Fully Functioning  
Prototype

**Data Ingestion** - Natural Language Processing (NLP),  
Speech Recognition Engines

**Evolutionary Algorithm Brain Engine**

**Communication Fabric**

**Security Components**

Q1 2022 - Full Product Release

**Emotion** and **Micro-expression** Recognition Engine

Remote Service API

Full **Goal Recognition** and Processing Engine

Q1 2023 - Phase 2 - Sci-Fi Version  
Initial Release

Enhanced HMI **Hardware**

**Holographic** Image Development

Personality Exchange

Direct Brain-Computer Interface

Q1 2024 - Sci-Fi Full Release

Q1 2025

Full Global

Ecosystem Release

# ThoughtAI Team

- Andrew J Hacker, CEO
- Howard Bloom, Futurist/Visionary, Author
- Sabine Allaey, Expert Visualizer/Explainer
- Phil Grim, PhD Candidate, CTO, AI Expert
- Matthew Hykes, Chief Architect
- Sam Jones, VP Engineering
- Nate Dimemmo, Chief Strategy
- Andrew Weiss, Chief Counsel
- Kevin Purcell, PhD, Chief Data Scientist
- J Gregory Swendsen, Finance
- Rob Furey, PhD, VP Technology Applications
