Thought

Global Decentralized "Self-Aware" Artificial Intelligence

Unlocking Insight And Knowledge From The World's Data
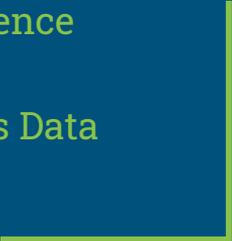

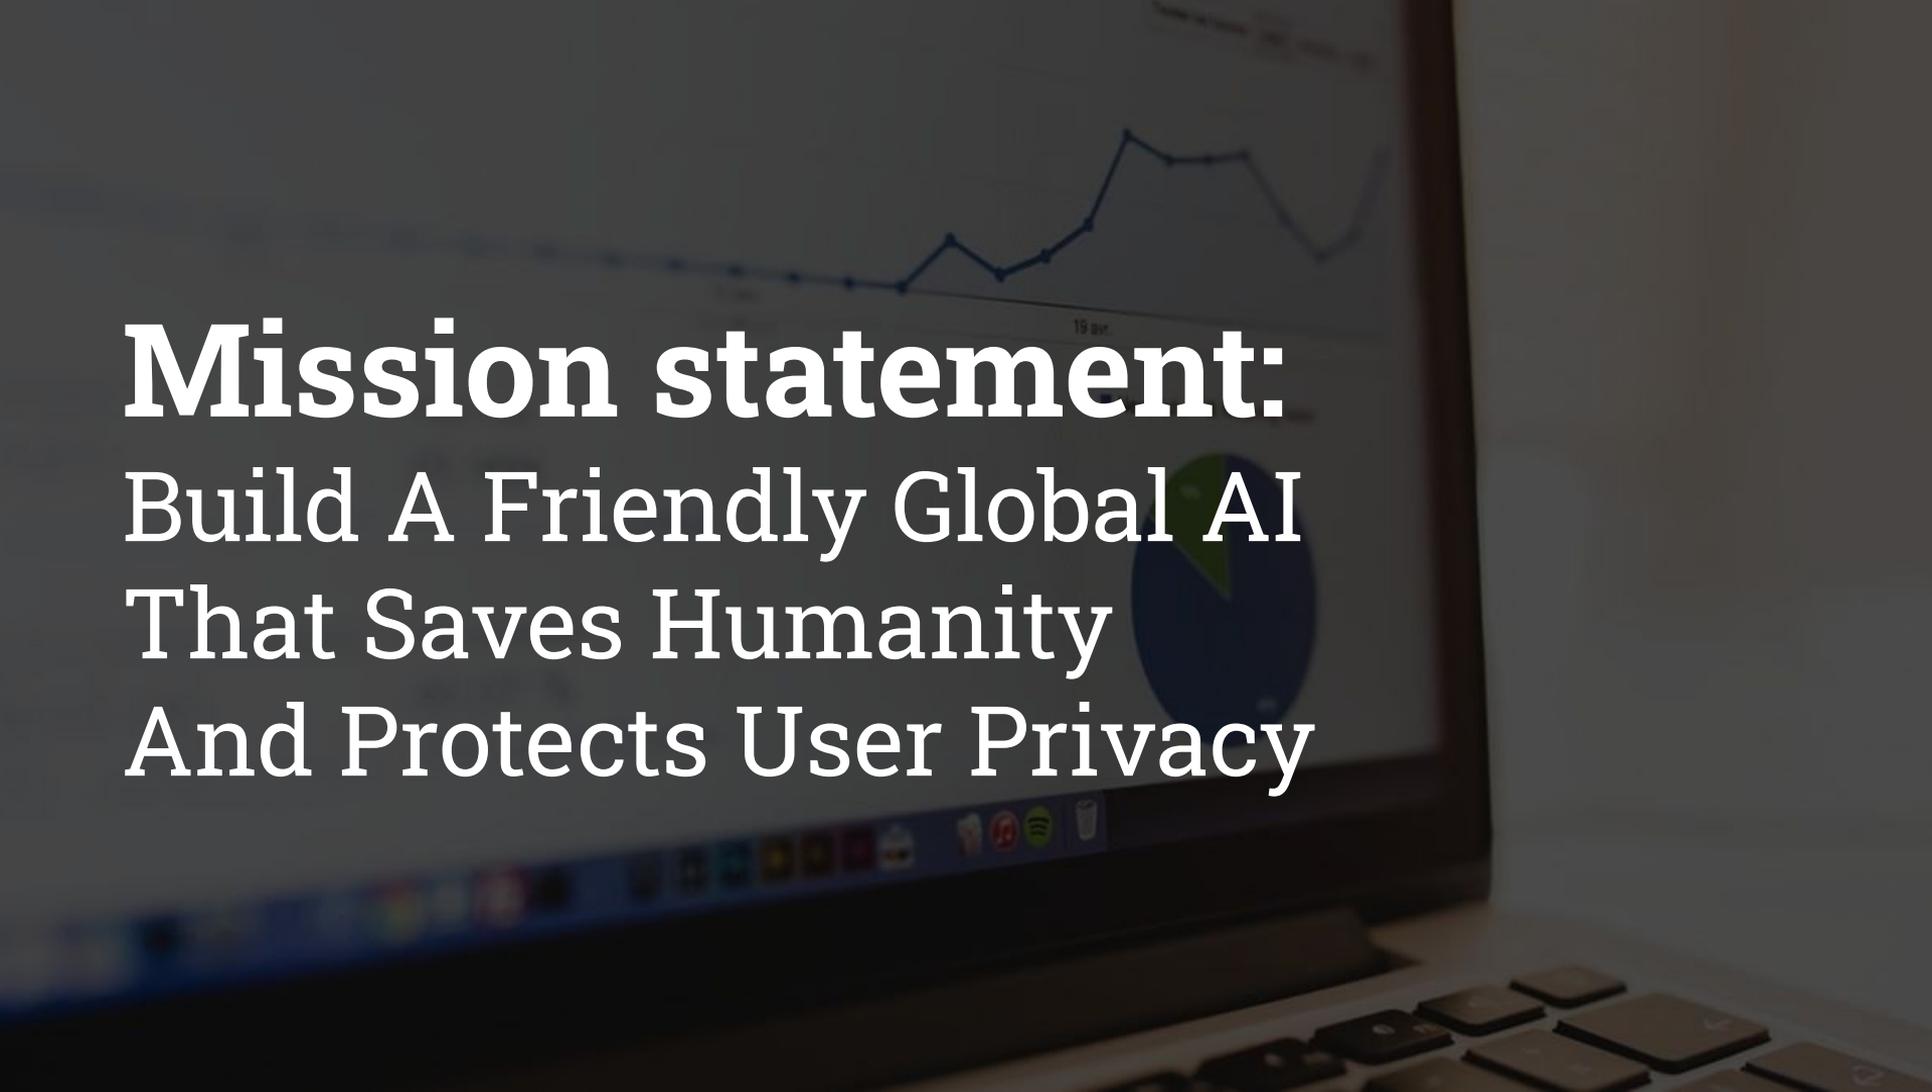

https://thought.live
andrew@thought.live

Mission statement:

Build A Friendly Global AI
That Saves Humanity
And Protects User Privacy

The problem

Too Much Misused Data Not Enough Intelligence

Current AI Approach Dangerous And Flawed

Billion $ Privacy Fines

No Way To Value Algorithms Or Knowledge

Non-existent Information Interoperability

Total Datasphere

Zeta Bytes = Trillion Gigabytes

175ZB

80ZB

45ZB

40ZB

2019　　**2020**　　**2022**　　**2025**
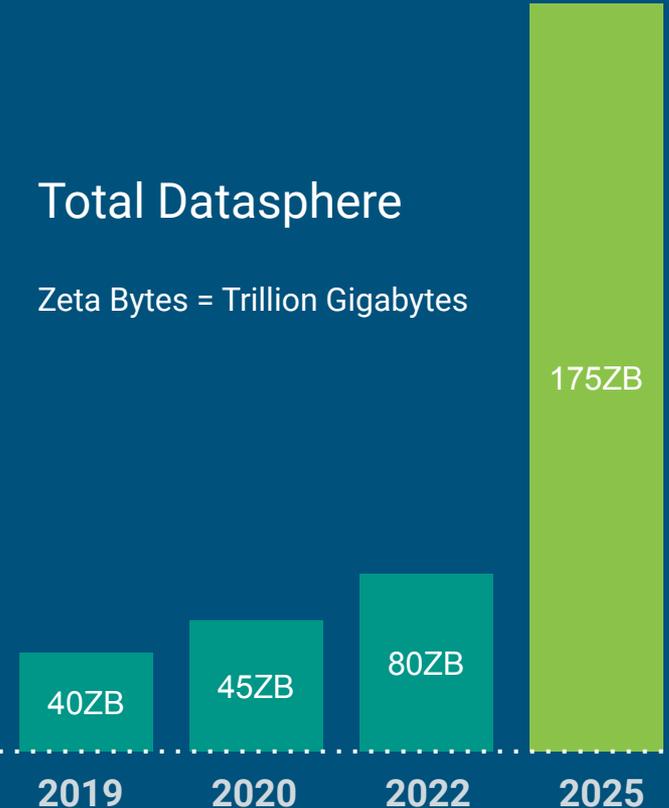

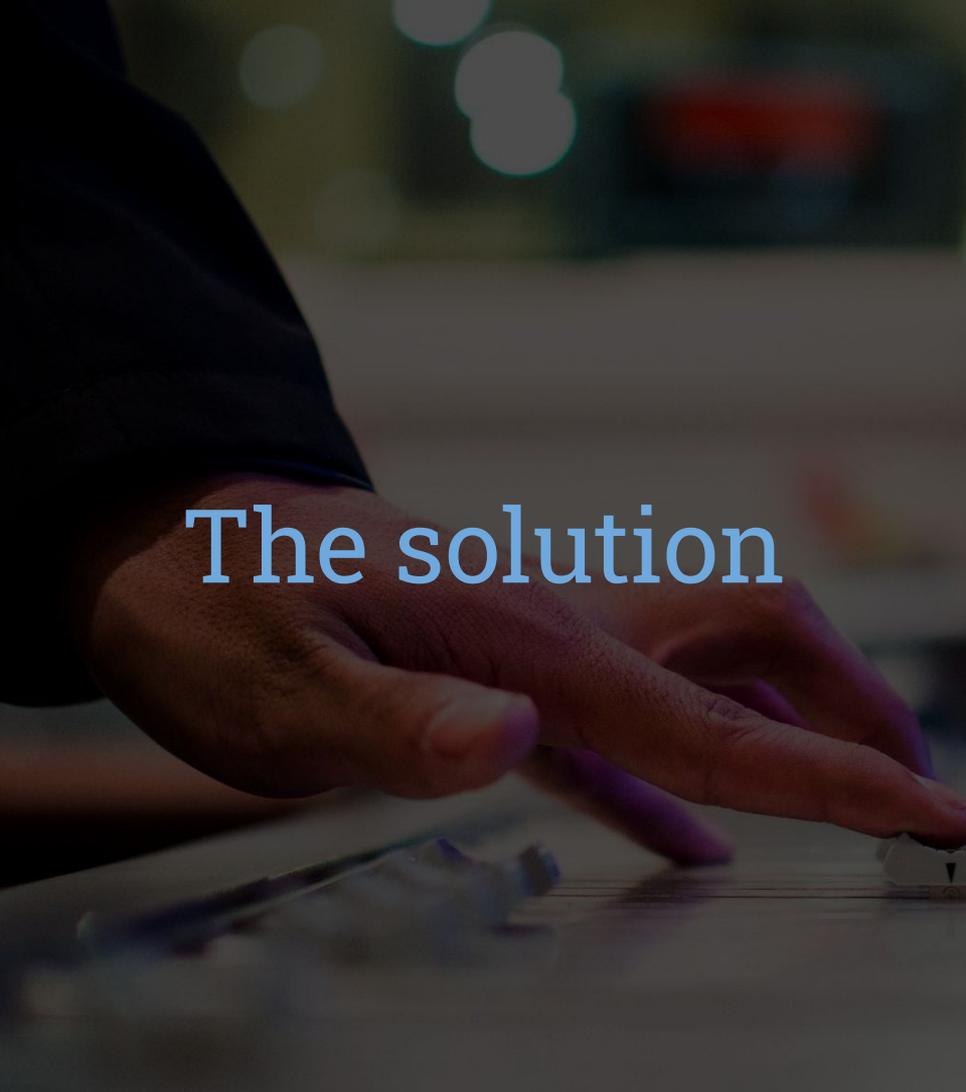

The solution

Create "Self-aware" Information By Combining Information (Data) And Intelligence (Algorithms)

- "Self-aware" Information Using Complex Adaptive Systems
- Safe AI through Evolutionary Algorithms (EAs)
- Solves AI issues - black box, transparency/privacy, training
- Eliminates Privacy Fines (GDPR)
- Prevents data theft, gives control over data sets
- Increase revenue and value of data and algorithms based on quality and strength
- Universal translator for cross-industry and cross-platform communication
- Eliminate application complexity costs
- Improves device/data management efficiency and increases amount of usable data
- Leverage blockchain technology for encryption structure, monetization, and transparency

Executive Team

- Andrew J Hacker, CEO
- Phil Grim, PhD Candidate, CTO, AI Expert
- Andrew Weiss, Chief Counsel
- Matthew Hykes, Chief Architect
- Sam Jones, VP Engineering
- Nate Dimemmo, Chief Strategy
- Kevin Purcell, PhD, Chief Data Scientist
- J Gregory Swendsen, Finance

Milestones

Significant Growth In 2021

January 2021

Aggressive Team
Scaling

June 2021

Full Enterprise Solution
Release

December 2021

Reach Phase 1 Revenue
Target

Acquisition

Market —

- *Smart Healthcare/Biotech $1.335T by 2025, 17% CAGR*
- *AI market $1.2T by 2025, CAGR of 45.4%*
- *IoT/Smart City $8.9T by 2020*
- *AR/VR $160B by 2025*
- *Blockchain $3.4T by 2025*

How it works
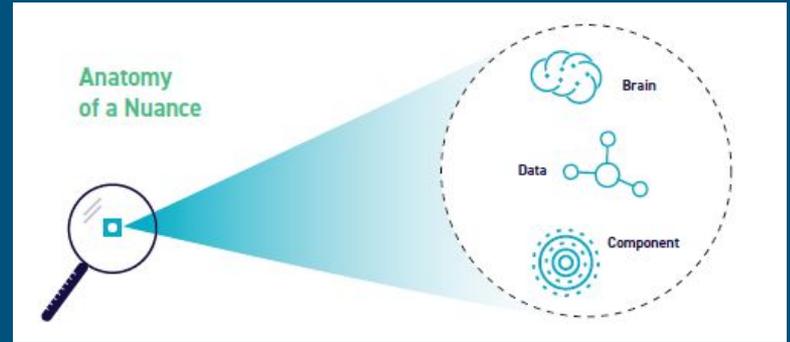

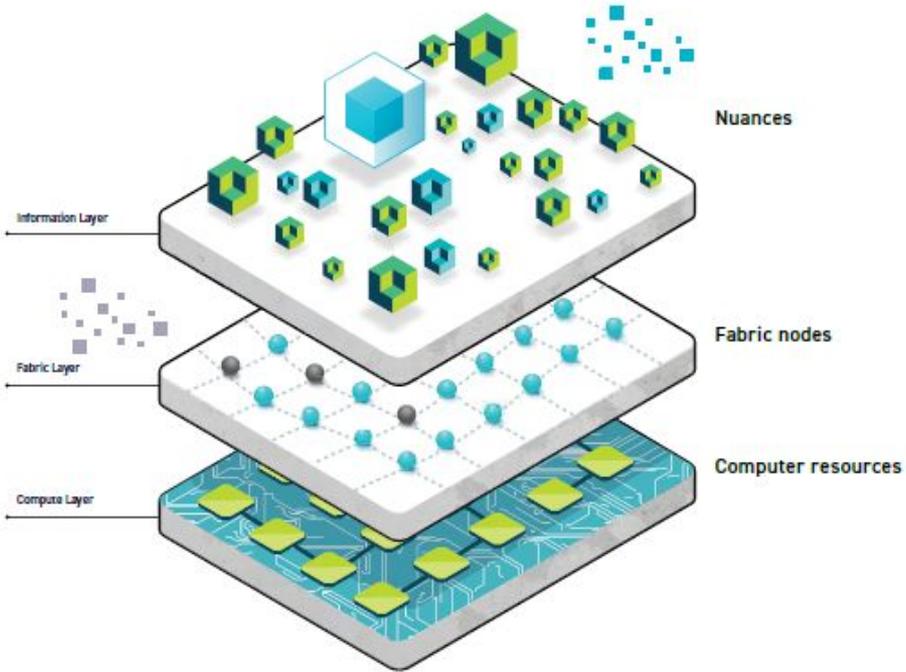

Strategic Partnerships/Joint Ventures

- Space Development Steering Committee - Solar Power from Space, Buzz Aldrin, Howard Bloom, Dr APJ Kalam, 11th President of India
- Company Confidential - Telemedicine, automated Cognitive Behavioral Therapy, COVID-19 Remote Care
- ESports - In-game Smart Objects and Widely Accessible Text-racing Startup ESport League
- Company Confidential - Natural Language Processing (NLP) and Voice Recognition Detect COVID-19 Related Dementia, also early Alzheimer's detection
- Company Confidential - AI Healthcare/Hospital Resource Management Optimization

- SoulMate - World's First Conscious "Self-aware" Digital Human Soul, Personal version of "Alexa"
- Zevolve - EV Chargers, 4G/5G, portable EV charging stations
- Zowasel - Nigeria, AI/Blockchain Digital Agriculture Marketplace, Smart Crops, Supplychain, Payments
- UMI - Community Based Participatory Research, Improving Community Access To Essential Resources
- COVID-19 Sterilization Robot, smart service Robots
- DPHR - AI/Data driven Healthcare

Corporate Partnerships
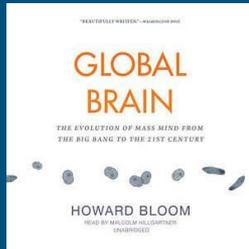

Accomplishments

- **Strong foundational IP** - US patent covering smallest possible slice of **"self-aware"** information and **smart contracts** – IP covers many new advanced information technologies
- **New "bottom-up" approach to AI** that will undercut established players and solve many problems associated with centralized AI applications.
- **Human AI Interface** with Thought XR - Extended reality for additional market capture.
- **Healthcare wearable** with secure advanced AI and analytics
- **3D model encryption** - New **quantum-resistant** high-performing and more secure model that could lead to cornering of markets including data protection, algorithm processing, media distribution, financial transaction processing
- Advisory board of **academic experts**
- 2-Tier AI processing blockchain
- **AI/Cryptocurrency Exchange** Initial Technology Build-out
- **Green Hybrid** POW/POS hashing algorithm
- Strong application models in COVID-19, Healthcare, Supply Chain/Distribution, Media Distribution, Global Satellite Communications, IoT, Smart City

Revenue model

- Flexible Multi-tiered Model
- Autonomous Algorithmic Fee Generation
- Smart Contract Patent Covers Multiple $B Market

AI Algorithm And Data Marketplace

Transaction Fees And Subscription Model

Licensing
