

Basic Unit Of Digital Life

Nuances are a special kind of self-aware intelligent agent and serve as the building blocks for Digital Life in the ThoughtAI Universe.

Digital Lifeforms are created by developers who create blueprints for individual archetypes of Nuances.

Similar to classifications of physical life on Earth such as single cell organisms and multicellular organisms, Nuances are able to create simple and complex digital lifeforms that "live" on the ThoughtAI fabric.

Another important aspect of Nuance based digital life is that those Nuances "persist" to exist and evolve over time.
